Catalogue September 2021

A message from the CEO,

Tie Down Engineering South Africa started off with only a few clients in 2016 and we wouldn't of been here today if it wasn't for our loyal and valued clients.

Our main goal is to become the flagship distributor of custom designed products in our fields of expertise within Southern Africa.

We take great pride in our high quality, value for money range of products and encourage our customers to challenge us to achieve new heights.

With this latest catalogue, I'd like to ensure everyone that we do our best to keep delivering a quality service.

If there is ever the need to inquire about any of our products, then don't hesitate to contact me personally.

**Sincerely,
Danie Groenewald**
